Has The Cure For Cancer Been Here All Along?

By Jane Jarvis

Has The Cure For Cancer Been Here All Along?

by: **Jane Jarvis**

Cancer treatment and medication is a multi-billion dollar industry--so why would hospitals and pharmaceutical companies want a cure?

Have you ever heard of a doctor giving someone with stage 4 or 5 cancer a 90-100% chance of success at beating the disease? I didn't think so. Well, there is a way you can beat these dismal odds. If you, a friend, family member, or even an acquaintance has cancer, wouldn't you like to know the cure?

If you want to know how to beat cancer, you may need look no further than cancercuresecrets.com. They provide information that has been put under wraps for years. Did you know there is a doctor in Mexico who has a 98% success rate with curing bone cancer? Did you know clinics exist that can offer a 90-100% success rate with curing 4 and 5 stage cancers? Did you know there is a new form of super supplement that helps people quietly cure themselves of cancer? Most of us didn't know that there exists a cancer treatment so effective, it kills cancer cells 100% of the time, anywhere in the body, with no toxic side- effects! Unfortunately, most cancer patients don't know about this treatment... and they continue to suffer through hours of debilitating chemotherapy.

For decades, pharmaceutical companies have developed new drugs to help treat the symptoms of diseases such as cancer and AIDS. What about the cause? Why haven't their efforts been aimed at prevention, the cure before the disease? The answer is simple. If you have cancer, the average cost of treatment is \$250,000-\$750,000. If people didn't get cancer and other serious diseases, these companies would lose huge amounts of money. Their main interest, right or wrong, is staying in business.

Many people scoff at these disturbing ideas. They want to believe that they are in control of their own lives. But if you believe there aren't immoral and unethical people out there just sitting around thinking of ways to make money at the expense of others, you are wrong. We live in a world where people cannibalize their neighbors and blow up buildings full of people, so is it that hard to believe that there are people willing to let you stay sick so they can make billions of dollars?

Cancer: Are There Good Treatment Alternatives?

By Gabriel Adams

If you or one of your loved ones has cancer, you probably know all too well what the conventional treatment for cancer is. Often called by cynics the cut, burn, and poison method, conventional treatments are basically limited to surgery, radiation, and chemotherapy.

Even though many thousands of individuals have spent countless millions of dollars over the past few decades campaigning for the cure for cancer, we're no closer. In fact, cancer deaths are on the rise. Perhaps, though, it's because we're looking for the cure for cancer in the wrong place!?

Paracelsus is credited to have said that "All that mankind needs for good health... is provided by God in nature... the challenge is to find it." Perhaps if we want to find the cure for cancer, we need to be looking at what God gave us for good health.

The idea that health can be achieved without drugs is not just a hypothesis, either. There is a large amount of scientific research proving that various nutritional substances can have amazing effects on disease, even cancer. Take for example phytonutrients. Newsweek Magazine actually ran a front page article on how phytonutrients had been found to necrose cancer cells.

Other good examples are glyconutrients and antioxidants. Scientific studies have documented was better results with natural substances such as these than the medical community can even hope to get.

The bottom line is: The medical community is not acting like they really want to find the cure. If you have cancer, it's up to you to do the research and find natural substances that can help you fight the cancer effectively and naturally. Do remember, though, that it's illegal to market a natural product as something that cures disease. The drug companies have a monopoly on the word cure - even though it seems that they are not very good at it!

To discover 350 natural products that people have used to beat their cancer, please visit <http://www.naturalcancertreatments.com>
